BioDox™

CONCENTRATED LIQUID STERILIZER
HARD SURFACE DISINFECTANT STERILIZER.

KILLS ALL PATHOGENS. LEAVES NO TRACE.

Concentrated BioDox™ (Chlorine Dioxide) is the safest and most effective solution for your disinfectant and sterilization needs. This safe, effective, and economical solution destroys up to 99.9999% of harmful pathogens without harming people, plants, or the planet.

ADVANTAGES

- One solution treats pathogens in every step of your operation.
- Effective against the most resistant germs
- Destroys the most dangerous biofilm
- Lowest corrosion in class makes it ideal for sterilizing expensive equipment
- Leaves no residue, No rinsing is needed
- Costs less & does more than the competition
- Replaces bleach in any application
- Concentrated formula in environmentally friendly packaging.

BioDox™ is a Foodwash: FDA GRAS (Generally Recognized as Safe).

BioDox™ can be used on high value Equipment and will leave the least amount of corrosion.

BioDox™ provides biofilm Control in Irrigation tanks and lines.

BioDox™ is safe and effective to use in footbaths, walls, containers, clothing, and hands.

BioDox™ can be used on all other surfaces including walls, floors, cabinets, sinks countertops.

Apply BioDox™ anywhere you see mold or biofilm, such as in fans and other operation fixtures.

FEATURE COMPARISON	Chlorine Dioxide (BioDox™)	Sulfur	Hydrogen Peroxide	Sodium Hypochlorite (bleach)	Isopropyl/Isopropanol Alcohol
Safety	Excellent	Poor	Poor	Poor	Poor
Germs adapt over time	No	Yes	Yes	Yes	Yes
Residue and byproducts	Zero	Yes	Some	Some	Zero
Cost	Low	Low	High	Low	High
Destroys biofilm	Excellent	Poor	Poor	Poor	Very poor (promotes biofilm)
Corrosion	Zero to Low	High	Low	Low	Moderate (solvent)
Concentration	3 – 100 ppm	2k – 4k ppm	5k – 100k ppm	500k – 600k ppm	700k ppm

APPLICATIONS

BioDox™ can be applied anywhere you see mold, or biofilm. BioDox™ can be used anywhere and on anything to promote a sterile environment. The most common application methods are with spray bottles, pump sprayers, electrostatic sprayers, farm implements, mop buckets, misting systems, and humidifiers. BioDox™ is sprayed directly onto produce, surfaces and then allowed to dry for best results.

DILUTION

- One Quart of concentrated BioDox™ will create 64 quarts of the most effective and versatile protection available.
- Fill container with water and then add BioDox.
- Do not shake or leave in direct sunlight.

STORAGE

- Store concentrated BioDox™ in a cool, dark place for a shelf life of 6 months.
- Refrigerate for a shelf life of one year.
